

## Precast Division

### Specialists in Precast Concrete

#### The Cross 2000 gallon liquid storage tank

**Cross 2000 gallon precast liquid storage tanks are designed to BS 8110 and BS 8007.**

The precast liquid storage tank is both cost effective and versatile, with applications in the commercial, residential and agricultural sectors. These tanks can be used as a component of rainwater harvesting systems.

Water is a precious natural resource and its sustainable management is essential to protect the environment and to meet current and future demand. It is important that we adopt more efficient water use patterns and the Cross 2000 tank is at the forefront of this strategy.

#### Precast Concrete Stairs

**Precast concrete stairs and associated landings are designed to BS 8110.**

Each stair is designed and manufactured to meet the specific needs of each individual project, both in the commercial and residential sectors.

concrete flooring Ltd.

## Prestressed Division

Specialists in Precast Concrete

### Manufacturing

Cross Concrete prestressed flooring units are manufactured to BS 8110 on heated steel beds in controlled conditions.

### Quality

Our prestressed units are designed to each individual's specific needs. Service ducts, open cores and reduced ends can all be incorporated during manufacture, minimising on site labour costs.

### Specification

Cross Concrete Flooring Ltd. can design a range of flooring solutions ensuring a quality finish, minimum fire resistance rating of 1 hour and reduced sound and heat transmission.

### Product

Prestressed flooring units go directly to site providing an immediate dry working platform for all follow-on trades, thus minimising site delays. They are weather resistant and maintenance free.
